

REPORT OF PHYSICAL EXAMINATION

APPOINTMENT AS AN OFFICER A-V(S) U.S.N.

Purpose of this examination 27991 A-V(S) Date of examination 5-5-42

Place of duty _____ Place of examination NAVAL OFFICER PROCUREMENT

Name NIXON, Richard Milhous Rank Civilian Washington, D.C.
(Surname first, Christian names in full) Corps

Place of birth California Date of birth 1-9-13

Family history Father and mother both living and well.

History of illness or injury Usual childhood diseases. Pneumonia 1916.

Head and face Normal

Eyes: Pupils (size, shape, reaction to light and distance, etc.) Equal, react to light and accommodation.

Distant vision Rt. 20/20, corrected to _____/20 by J-1

Lt. 20/20, corrected to _____/20 by J-1

Binocular vision Normal (Stillings 1929)
(Without lenses—Recorded only when visual defects exist) (State edition of Stillings' plates used)

Disease or anatomical defects none

Ears: Hearing Rt. Watch 40" Coin click 20' Whispered voice 15 /15' Spoken voice _____/15'

Lt. Watch 40" Coin click 20' Whispered voice 15 /15' Spoken voice _____/15'

Binaural 15' Disease or defects none
(Spoken voice)

Nose normal
(Disease or anatomical defect, obstruction, etc. State degree)

Sinuses normal

Tongue, palate, pharynx, larynx, tonsils normal

Teeth and gums (disease or anatomical defect): normal, except as noted below:

Missing teeth 1-9-16-26-30.
(List numbers)

Nonvital teeth # 7
(List numbers)

Periapical disease none
(Degree)

Marked malocclusion no
(Yes or no)

Lack of serviceable occlusion no
(Yes or no)

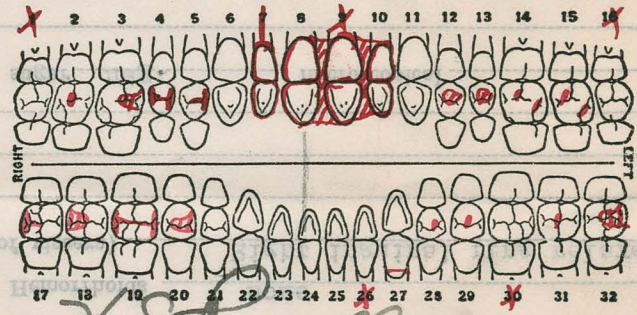

Pyorrhea alveolaris none
(Degree)

Teeth replaced by bridges 9
(List numbers)

Meets dental requirements yes
(Yes or no)

Dentures none
(Description)

Mark missing teeth by X whether replaced or not. Show size and position of caries in black, use red to indicate fillings and restorations.

H. S. POWELL (DC) USNR.
(Signature of dental examiner)

General build and appearance Medium, well developed.
(State whether slender, medium, or heavy, and postural abnormalities)

Temperature 98.6 Chest at expiration 36 1/2

Height 70 1/2 Chest at inspiration 39

Weight 161 Circumference of abdomen at umbilicus 34

Recent gain or loss, amount and cause none

Skin, hair, and glands normal

Neck (abnormalities, thyroid gland, trachea, larynx) normal

Spine and extremities (bones, joints, muscles, feet) normal

Thorax (size, shape, movement, rib cage, mediastinum) normal

Respiratory system, bronchi, lungs, pleura, etc. normal

Cardio-vascular system normal

Heart (note all signs of cardiac involvement) normal

Pulse: Before exercise 92 Blood pressure: Before, S 132, D 80

After exercise 104 Three minutes after, S 136, D 80

Three minutes after 96 (Manual of the Medical Department par. 1520(6))

Condition of arteries normal Character of pulse full and regular

Condition of veins normal Hemorrhoids none

Abdomen and pelvis (condition of wall, scars, herniae, abnormality of viscera) Right inguinal ring relaxed.

Genito-urinary system normal

Urinalysis: Sp. gr. 1.018, alb. neg., sugar neg., microscopical

Venereal disease no signs, denies history.

Nervous system normal (Organic or functional disorders)

Romberg negative Incoordination (gait, speech) none noted.

Reflexes, superficial normal, deep (knee, ankle, elbow) normal Tremors none

Serological tests (when required)

Abnormal psyche (neurasthenia, psychasthenia, depression, instability, worries) none evident.

Smallpox vaccination { Date last vaccination 1936 Typhoid prophylaxis { Number of courses none
Reaction Positive Date of last course

Remarks on abnormalities not otherwise noted or sufficiently described above none

Summary of defects None disqualifying.

Is the individual fit to perform active duty at sea or on foreign service? (If not, state limit of duty) YES.

Findings and recommendations (as per Courts and Boards, when necessary) WE hereby certify that Mr. Richard Milhous NIXON, IS physically qualified for appointment as an officer, Class A-V(S)USNR.

MEMBERS STATUTORY BOARD OF MEDICAL EXAMINERS
H. H. DOPLER LT. COMDR. (MC) USN (RET.)

CLINICAL RECORD

ABBREVIATED CLINICAL RECORD

PERTINENT HISTORY, CHIEF COMPLAINT, AND CONDITION ON ADMISSION

This 44-year-old man was examined this date for a routine annual check-up. He has a known hiatal hernia which is asymptomatic. Following a trip to Africa in May 1957 he was found to have amebiasis and was treated with diodoquin and terramycin. Follow-up stools revealed no remaining amebiasis. About 3 weeks ago he had a moderate attack of influenza.

At present he complains of fatigue about mid-afternoon which has been present for 6 weeks. For the past month, he also states, he has had an occasional catch or vague discomfort in his right chest at about the 5th interspace near the sternal border. This discomfort occurs suddenly, will last only a few seconds, and is not associated with dyspnea or aggravated by breathing. It is not noted on exercise, but is noted when he has been very active in conference or at his desk. It may occur 3 to 4 times in one day and is usually noted shortly after he gets to the office and also in mid-afternoon. It does not appear every day but he thinks it occurs usually after he has had spicy, highly seasoned foods the night before.

There are no other gastrointestinal symptoms, no history of melena or diarrhea recently. System review is otherwise negative.

COMPLETE PHYSICAL EXAMINATION IS ESSENTIALLY NEGATIVE EXCEPT FOR THE FOLLOWING:

Blood pressure, 112/68; pulse, 70, regular. Height, 70"; weight, 170. This is a normal appearing, active man who does not appear acutely or chronically ill. There are no skin lesions or adenopathy. The pharynx is slightly injected. Thyroid is not palpable. Chest, normal. Lungs are clear. Heart is normal size. Tones are normal with no murmurs present. The abdomen is soft. Liver and spleen are not palpable. Rectal examination is within normal limits. Prostate is firm, symmetrical; no nodules or tenderness noted. Extremities are normal. Neurology examination is normal.

The transient, inconstant discomfort does not follow any particular pattern and does not suggest angina clinically. There are no other findings to suggest any coronary involvement. Also, it is not believed due to any stomach disorder or be related to the hiatal hernia.

PROGRESS

21 Nov 57 - Routine laboratory work, x-ray of the chest and ECG will be made, plus stool examinations for parasites and ova.

X-ray of the chest and ECG are within normal limits. Stool examination is negative for occult blood and no ova or parasites were seen. Urinalysis was within normal limits.

WALTER REED ARMY HOSPITAL
WALTER REED ARMY MEDICAL CENTER
WASHINGTON 12, D. C.

IN REPLY REFER TO **MEDEC-GE**

20 January 1958

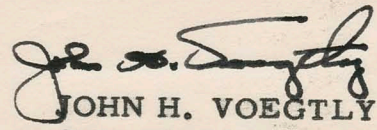

Rear Admiral O. B. Morrison, Jr.
District Medical Officer
Fifth Naval District
Naval Base
Norfolk 11, Virginia

Dear Admiral Morrison:

I have been apprised by Colonel Eugene C. Jacobs, The Surgeon, United States Army Hospital, Fort Monroe, Virginia, that you are especially desirous of receiving a copy of a recent physical examination on Vice President Richard M. Nixon--this, in order to keep current his membership in the Naval Reserve.

The Vice President was a patient at Walter Reed Army Hospital for a routine annual checkup in November of this past year. A copy of the abbreviated clinical record made at that time, which I have enclosed, may be of assistance to that end.

Very truly yours,

JOHN H. VOEGTLY
Colonel, Medical Corps
Executive Officer
